I: Roth--146 (No date) 1890 Tasmanians
116, 805

"It would seem from a statement of La Billardière's (II. p. 61) that the Tasmanians had some idea of regulating time by the apparent motion of the sun. He says some savages gave him to understand that in two days time they should be very near the ships. To inform La Billardière that they should make the journey in two days, they pointed out with their hands the diurnal motion of the sun, and expressed the number two by as many of their fingers. This is the only reference to any knowledge of the movements of the heavenly bodies."
